Application Highlight

Broadcasting
For broadcast quality uncompressed video, we offer a supreme storage solution for D2D (disk to disk) backup and near line editing. In the production industry, it is important to emphasize time is as valuable as money. With RAID architecture, iStarUSA Group provides over 800MB/sec data transfer rates on our products. It is the ultimate choice for those applications that require extremely high performance coupled with vast amounts of storage capacity.

Digital Content & Filming
We offer a high capacity solution and extreme performance for today's demanding real time video editing, motion graphics designing, and high resolution multi-track audio recording. Many projects and video streaming are needed to be stored accurately, safely, and individually to find the location of data easily. Ninety percent of errors in the film industry are due to malfunction of hard drives and equipment. The professional line of iStarUSA Group's high performance products are well suited to digital media content applications.
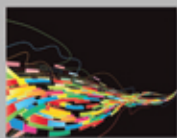

Military
We offer a high capacity solution and extreme performance for today's demanding real time video editing, motion graphics designing, and high resolution multi-track audio recording. Many projects and video streaming are needed to be stored accurately, safely, and individually to find the location of data easily. Ninety percent of errors in the film industry are due to malfunction of hard drives and equipment. The professional line of iStarUSA Group's high performance products are well suited to digital media content applications.
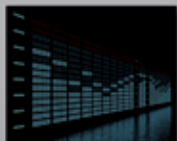

Healthcare
Since computer technology has evolved, many medical and healthcare institutes are transferring data like ultrasound and radiography from film and videotape to digital imaging systems for fast, accurate access to data and storage of digital records. iStarUSA offers solutions with data protection for storing vast amounts of data.

Gaming
Looking to create the next breakthrough in online gaming? If your goal is to turn concept into reality, then you are in line with iStarUSA Group. We can help. Our server chassis, cabinets, power supplies, and accessories are essential equipments for your next big development. Don't get boxed in. With iStarUSA Group, our product gives you infinite possibilities.

Music
What if Beethoven had lost his original score, ran out of paper, or spilled the ink? iStarUSA Group wants to ensure that modern day music composers and producers don't make the same mistake that could have ruin a legend. Our racks and cabinet selections are plenty and units are mobile and secure. Our storage and servers system will ensure you keep all your work where it belongs... at the tip of your fingers. We even have an entire lineup of quiet features so that noise from technology is kept at a minimum because genius is at work.

Home
iStarUSA aims to make each and every home more technologically advanced. Home desktops are evolving, and home servers are the backbone of future smart homes. Build your own with iStarUSA Group to ensure digital memories are stored, data is backed up and recoverable, and sharing capabilities are simplified through remote access.

Surveillance and Security
iStarUSA Group offers professional desktop JBOD chassis and RAID embedded subsystems for today's data intensive applications. We provide ideal solutions with RAID technology and hot-swappable redundant power supplies to maximize system up-time and ensure data is protected. It is a high capacity and low cost storage solution to meet massive digital video recording needs.

About iStarUSA Group
Five Brands, One Goal

Company
iStarUSA Group has over 20 years of experience in the industrial computers industry. We specialize in OEM/ODM projects and manufacturing of industrial and redundant power supply, server chassis, rackmount cases and server cases, server & rackmount cabinets and server racks, data storage, and custom power supply solutions.

Five Brands
Our brands are iStarUSA, Claytek, RAIDage, Xeal, and Claypower. They include product lines such as server rackmount, rackmount chassis, hard drive accessories, server cabinets, wall-mounted cabinets, open frame racks, cabinet accessories, eSATA RAID storage, SAS expander RAID, Fibre Channel, iSCSI RAID, mini-SAS-SFF8088, Redundant Power Supply, High Efficiency 80 Plus Power Supply, Redundant Power Modules, PS2 Power Supply, Medical Power Supply, DC Power Supply, Open Frame Power Supply, and Cold Swap Power Supply.

One Goal
- **Innovation:** We provide not only the technology to our customer we also develop our products to accompany modern life.

- **Customization:** Our design is tailored specifically to fit our customer needs. We help our customer to build their branded enterprise.

- **Satisfaction:** The goal of our products and services is to help our customer succeed in today's ever changing market.

Solution
iStarUSA OEM/ODM Services has partnered up with the industry's top System Integrators to provide every customer with comprehensive resources, technical knowledge, consistency, flexible component options, competitive pricing, reliable lead times, and exceptional service and support. Each of our valuable and dedicated product engineers have extensive knowledge of our products and services. One of the key elements for success is finding a manufacturer that can provide good service and support. We not only offer reliable products, exceptional support, and flexibility, we are also known as the DO-IT-ALL manufacturer because of the complex projects we have done. From custom branding to redesigning a specific product to fit any spec, we have the experience and capability to turn your ideas into reality.

RAIDAGE®

DATA STORAGE SOLUTION

RAIDAGE®
Powered by iStarUSA® Group

RAIDage - Powered by iStarUSA Group. RAIDage is the leading RAID subsystem service provider. Our storage enclosure offer custom solution for your exclusive data storage application. Based on over a decade of design experience and support, our design team provides OEM/ODM storage solution from concept to reality.

- Fibre Channel
- iSCSI RAID
- PCI-Express
- miniSAS-SFF8088
- eSATA-Port Multiplier
- Multi-interface
- Mini Trayless
- Custom Storage Tower
- Bridgeboard Adapter
- Accessories

Optimum mobility, data transfer rate, and storage capability is needed for your high density storage systems. Data management is made easy with RAIDage.

Fibre Channel, iSCSI RAID, PCI-Express, miniSAS, and eSATA-Port Multiplier are just the tip of the iceberg in data storage technology. RAIDage is moving ahead of the technology curve to prepare for the next generation of data integration.

Customizable storage towers are the most flexible and mobile solution for small businesses and home offices. Search for the right components to build your business today, and keep up with the new product introductions by visiting our website frequently.
