WD Series
All the Strength of an Industrial Chassis in a Sleek Design

Strong on the Inside, Sleek on the Outside

Built to be even more rugged than its predecessors, the WD Series is perfect for industrial work stations. The WD Series is not only lightweight and sleek, but made with high-quality steel, these racks hold industrial-grade strength too.

Choose Your Combination

You can choose from 3 different depths of racks: 450mm, 600mm, and 800mm. We also give you the options of substituting a heavy duty wood top, adding an LCD arm, and adding feet to your rack. Ranging from 4U to 18U, the WD Series allows a great variety of combinations of standard rackmount equipment to suit your unique work setting.

Slide Them Anywhere

These units are easily portable. With casters loaded on the cabinet's base, it is easily slid into any under desk area or can stand as a unit of its own. Its mobility not only allows you to effortlessly change its placing, but also gives you easy access to the back panels of your chassis. Another aspect which enhances easy access and portability are the side handles. Embedded in the case, they do not stick out or take up any extra space. You can fit these enclosures into tight spaces both vertically and horizontally.
